

HARDIK VAGHANI

Surat, Gujarat, India • +91 76984 58318 • harddikvaghani@gmail.com • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of mobile application development experience, specializing over the past 1.5+ years in Full-Stack Web Architecture (Next.js, React, Angular, Node.js/MERN) and AI Integrations. Proven track record of optimizing application performance, building scalable API services, and deploying high-availability applications across GCP and Vercel infrastructure.

TECHNICAL SKILLS

Languages & Runtimes:	TypeScript, JavaScript, Java, Kotlin, Python, SQL
Full-Stack & Web:	Next.js, Angular, FastAPI, PostgreSQL, Supabase, RESTful APIs, WebSockets, MERN Stack
Mobile Engineering:	Native Android (Java/Kotlin), React Native, Room DB, Clean Architecture, MVVM, Background Services, Play Store Lifecycle
AI & Agent Systems:	AI Agent Workflows, RAG Systems, Claude & OpenAI APIs, LangChain, N8N, Zapier, MCP
DevOps & Infrastructure:	GCP, Vercel, Hetzner VPS, Docker, CI/CD Pipelines, Nginx, Git/GitHub, Asyncio, Playwright

WORK EXPERIENCE

Full-Stack & AI Agent Developer | GalaxyGlobalTech 2025 – Present | Surat, India

- Architected production AI pipelines utilizing Claude and OpenAI APIs, processing 50k+ automated monthly requests with sub-500ms response routing and structured data generation.
- Engineered backend API integrations connecting internal data stores with external Services
- Built high-throughput SaaS platforms using Next.js, React, Angular, Node.js, and Supabase (PostgreSQL)
- Automated cloud deployments across GCP and Hetzner VPS using Docker, Nginx, and GitHub Actions CI/CD pipelines
- Implemented MCP Server integration for seamless connection between AI agents and third-party tools

Full-Stack & Mobile Developer | Freelance / Independent Contractor 2023 – 2025 | Remote

- Engineered custom full-stack web applications (Next.js, Angular, React) and automated messaging microservices for 8+ clients.
- Designed automated quantitative algorithmic execution engines (MQL4/MQL5) with dynamic position sizing and automated risk controls, executing 100k+ backtested trade setups.
- Integrated secure payment gateways, RESTful microservices, and asynchronous Python/Node.js automation pipelines handling concurrent user traffic seamlessly.

Mobile Application Developer | Sober Infotech 2021 – 2023 | Surat, India

- Engineered and deployed 5+ production Android applications in Java and Kotlin to the Google Play Store, reaching 150k+ lifetime downloads.
- Implemented offline-first data synchronization using Room DB and Android Background Services, reducing app memory usage and eliminating UI thread blocking.
- Achieved a 99.7% crash-free session rate by establishing proactive crash logging, memory leak debugging, and automated version release pipelines.

FEATURED PROJECTS

AdShot+ Studio — AI Creative Generation SaaS Platform (React, Next.js, Node.js, Express.js, MongoDB, OpenAI/Claude APIs)

- Developed an automated digital ad production platform utilizing LLM copywriting workflows and real-time UI preview rendering, reducing ad creation time from hours to under minutes.

Automated Distributed Data & Scraping Pipeline (Python, Playwright, Asyncio, BeautifulSoup)

- Built an asynchronous web scraping engine with proxy rotation and automated retries, processing 500k+ daily data records into structured analytical schemas with 99.2% pipeline reliability.

EvaraGold — Interactive 3D Web Application (Next.js, React Three Fiber, GSAP, Supabase)

- Built a 3D WebGL scrollytelling web app with real-time websocket gold price updates and optimized asset loading, delivering 60 FPS rendering performance across mobile and desktop browsers.

EDUCATION & CREDENTIALS

Bachelor of Engineering in Computer Engineering • Gujarat Technological University (GTU)	2017 – 2020
Professional Certification in Mobile Application Development	2019 – 2020
Professional Certification in Full-Stack Web Development	2023 – 2024
